Factory Water Piping Available for Air Handling Units with Water Source Heat Pumps

Minneapolis, MN (September 16, 2010)

Innovent now offers factory water piping on air handling units with water source heat pumps. This option includes inlet strainers, shut-off valves, balancing valves and head pressure control valves; all piped to a single header.

Benefits include:

- Rigorous quality control.
- Greater reliability enabled by fully-operational factory-run-testing.
- Quick and easy connection to water main.
- Easy service access.
